THE SECRETS OF SKIN TIGHTENING WITH THE TITAN®

By Sidney B. Smith, MD, FAAD

While looking for the elusive 'fountain of youth', more and more savvy patients are not only turning to BOTOX® Cosmetic, Dermal Fillers, and Laser Treatments, but also to Cutera®'s Skin Tightening Procedure called the Titan®.

The Titan® procedure is an ideal non-surgical solution for tightening lax or redundant skin. Virtually any part of the body can be treated such as the face, neck, abdomen, arms, and thighs. Great results can be achieved without surgery, without general anesthesia, and no recovery time is needed.

Who is the ideal candidate for the Titan®? Both men and women who are showing signs of wisdom (aging) in the form of lax skin (i.e. 'turkey necks' and 'jowls') are ideal candidates for the Titan®. Additionally, post-pregnancy mothers who lost the baby weight, but haven't been able to tighten up the loose stomach skin are very good potential candidates.

How does the Titan® work? The Titan® utilizes an infrared light source to safely heat the dermal layer of skin to cause the collagen to contract and stimulate long-term collagen rebuilding. This improved skin tone gives you a more rejuvenated and energetic look.

The uniform distribution of energy that comes from the Titan® gives it an advantage over other similar type devices that patients are looking for. In other words, it will provide results. Some will see immediate results. Others will continue to see gradual improvement in their skin over the next six months after a treatment with the Titan® as new collagen is formed and the skin tightens.

Results can be achieved in just one treatment in some, but typically two to three treatments with the Titan® are recommended. Even more dramatic results can be achieved by combining the Titan® procedure with other treatments such as the Pearl™ (laser resurfacing), Laser Texturing & Fotofacials (3D effect), and Dermal Fillers (Radiesse®, Juvederm™, Restylane® – for a 'liquid lift'). The synergistic effects can be impressive.

If you want a safe and effective way to tighten the lax and redundant skin without the dangers of surgery or general anesthesia and do not want any downtime, look no further than the Titan®. Tighter, more rejuvenated skin can be yours.

The Cutera® Titan® skin tightening is an excellent choice if you want to look your best this year and in the future. Come to Dermacare Laser and Skin Care Clinics of Tri-Cities for a FREE CONSULTATION to see if the Titan is right for you. You too can Experience the Dermacare Difference!
