

Smartlipo MPX Liposuction is Your Best Choice

By Sidney B. Smith, MD, FAAD

Liposuction is the number one cosmetic surgery performed in the United States and Smartlipo MPX is your best choice! Revolutionary breakthroughs have been developed in improving the already very effective tumescent liposuction technique invented by a dermatologist in the early 80s. So what is new? The addition of lasers (ie the Smartlipo MPX at Dermacare) makes liposuction even better.

Some people may not realize that liposuction is for body sculpting and is not intended as a weight reduction treatment. Laser assisted liposuction is only part of your routine to maintain the best you possible. All patients are encouraged to live a healthy lifestyle that includes exercise and healthy eating.

With laser assisted liposuction, you not only lose the fat but you also get amazing skin tightening. Truly, laser assisted liposuction has numerous advantages over traditional liposuction which can be summarized in Dermacare's slogan of Safety, Value, & Results. In the hands of well trained physicians (ie Dermatologists and or other cosmetic surgeons) this is a very safe treatment with faster recovery. Laser assisted liposuction is more economical than previous generations of liposuction done in hospital operating rooms under general anesthesia and even tumescent liposuction done in offices. Laser assisted liposuction gives better results than traditional liposuction. The laser causes less surgical trauma, promotes faster recovery, less bruising, and amazing skin tightening.

With years of experience and training doing traditional liposuction, I have been waiting for the laser assisted liposuction technology to achieve its potential. It finally has with the new Smartlipo MPX by Cynosure that is only available to ‘core cosmetic specialists’: Dermatologists and Plastic Surgeons. I am excited to announce that the best, most effective, and safest form of liposuction is now in the Tri-Cities. Dermacare of Tri-Cities now has the Smartlipo MPX.

The Smartlipo MPX at Dermacare is the best and most effective form of laser assisted liposuction available. There are other laser assisted liposuction alternatives on the market, but none of them can compare to the great results achieved with the Smartlipo MPX that is only available at Dermacare of Tri-Cities.

I invite you for a free consult at Dermacare Laser and Skin Care Clinics of Tri-Cities to see if the Smartlipo MPX is right for you and to EXPERIENCE THE DERMACARE DIFFERENCE!
